

General Safety Information for Paragolfer User

The Paragolfer is a single person all-terrain special mobility device that lifts people from a sitting position to a standing position for the purpose of playing golf. It is designed solely for persons who are unable to walk or have a walking impediment while doing physically activity that requires them to maintain an upright body position. The ParaGolfer was specially designed for users who are able to independently move in a sports wheelchair.

1

The product allows for fast and easy adjustment of seat depth and lower leg length. It enables the operator to achieve an upright posture, with unrestricted shoulder movement when swinging a golf club.

This freedom is not only a huge benefit on the golf course; it also opens up new possibilities of movement during a range of other activities. The functions enable users of a range of mobility impairments and conditions including (but not limited to):

- Paraplegia
- Spina bifida
- Cerebral palsy
- Multiple sclerosis
- Muscular dystrophy
- Polio

The Paragolfer is available for hire to play rounds and to practice on the driving range. To use the Paragolfer the following safety requirements apply. You will need to:

- Provide a Medical Certificate and completed Health Disclosure checklist - once per year. **(Click on link for checklist)**
- Complete a Liability Waiver Form - first time only. **(Click on link)**
- Undergo an operator and safety brief and simple competency test by Long Reef Golf, or their representative
- Playing - Play accompanied with another person or carer – at all times
- Driving range – play accompanied with another person or carer – at all times
- Driving range - Use of the Auto Tee on the driving range and be unaccompanied following a simple competency test by Long Reef Golf, or their representative

Bookings are essential.
